

Students are able to install NI Multisim (14.2) and NI Ultiboard (14.2) directly from the NI website. This will minimize the time required on campus for the installation.

1. Go to [NI Multisim Download](https://www.ni.com/en-sg/support/downloads/software-products/download.multisim.html#312060)
(<https://www.ni.com/en-sg/support/downloads/software-products/download.multisim.html#312060>)
2. Click on Download
Select Education (Latest Version is 14.2, if Singapore Poly advises to use older version due to compatibility with teaching material, then select advised version.)

Provide Name, School (Singapore Polytechnic), Expected Graduation, Phone Number and School Email

This free evaluation of NI Multisim and Ultiboard Education Edition will allow you to evaluate the latest circuit teaching features of the software. Use our intuitive environment to encourage student discovery with interactive circuit simulation and 3D prototyping. Reinforce circuit concepts by visualizing circuit behavior using simulation-driven virtual instruments and advance analyses in Multisim.

This evaluation version of Multisim Education software includes limitations such as the inability to print schematics and export final Gerber files.

To Students: Please note you will be evaluating the Multisim Education Edition. Your purchase of the Multisim Student Edition will contain different functionality. [Learn more about the differences between academic editions](#) on page 9 of the Release Notes.
